# PERMA-SHIELD® GLIDING PATIO DOORS

## Features

### FRAME

**A** The sill of the Andersen® Perma-Shield® gliding patio door has an anodized aluminum track with a stainless steel cap that resists stain, rust and denting.\* A thermal barrier reduces conductive heat loss and limits condensation on the inside.

**B** All basic exterior frame members are covered with a rigid vinyl (PVC) sheath which maintains an attractive appearance while minimizing maintenance. Available in White, Sandtone or Terratone® color.

**C** Wood frame members are treated with a water-repellent preservative for long-lasting\* protection and performance.

**Factory-assembled doors are now available** (two-panel doors) and arrive at the jobsite ready to install. Unassembled doors are also available and require jobsite assembly.

**D** A flexible PVC weatherstrip on the head and side jambs provides a positive seal between the frame and panels.

### PANEL

**E** All panel surfaces are covered with a rigid vinyl (PVC) sheath which maintains an attractive appearance while minimizing maintenance.

Available in White, Sandtone or Terratone® color.

### GLASS

**G** A rigid vinyl or CPVC glazing bead features a flexible lip which provides superior weathertightness and long-term durability.

**H** Glass options include:

- Low-E tempered glass
- Low-E SmartSun™ tempered glass
- Low-E Sun tempered glass
- Dual-pane insulating tempered glass

Additional glass options are available. Contact your Andersen supplier. (Glass option must be specified.)

A removable translucent film helps shield the glass from damage during delivery and construction and simplifies finishing at the jobsite.

### Flexible Seal

A full-length combination weatherstrip/interlock system provides a flexible seal at the meeting stile.

\* For complete information on our limited warranties, visit [andersenwindows.com](http://andersenwindows.com) or contact your Andersen supplier.

NOTE: Andersen® patio doors are not intended for use as entrance doors.

## Exterior & Interior

### Hardware Finishes

Printing limitations prevent exact finish replication. See your Andersen supplier for actual finish samples.

Tribeca and Albany hardware are zinc diecast with powder-coated durable finish. Other hardware is solid forged brass. Mix-and-match interior and exterior style and finish options are available. Bright brass and satin nickel finishes feature a 10-year limited warranty.

## Accessories

Sold Separately.

### LOCKING SYSTEM

#### Reachout Locking Hardware

The unique Andersen reachout locking system pulls the door panel snugly into the jamb for weathertightness and enhanced security.

### FRAME

#### Extension Jambs

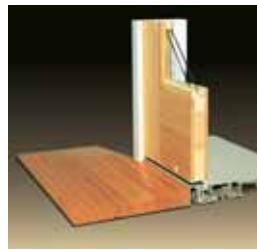

Standard jamb depth is 4  $\frac{9}{16}$ ". Pine, oak or maple veneer or white interior extension jambs are available for the following wall thicknesses:

- 5  $\frac{1}{4}$ "
- 6  $\frac{9}{16}$ "
- 7  $\frac{1}{8}$ "

#### Threshold

An oak or maple threshold is available for finishing the interior of the sill.

#### Ramped Sill Insert

Ramped sills provide smooth transition from interior to exterior and can be used with a retractable insect screen, but not a gliding insect screen. Shown here with an Andersen® Frenchwood® patio door. (Specifier must check with local and federal officials to determine if product meets accessibility codes.)

#### Sill Support

An aluminum sill support is designed to lock into a channel under the sill and tie back into the wall. This will offer support to the outermost sill section when needed. Available in neutral gray finish.

### HARDWARE

#### Exterior Keyed Lock

A six-pin key cylinder lock is available for all patio doors in styles and finishes that coordinate with hardware. This lock allows the patio door to be locked and unlocked from the exterior.

#### Auxiliary Foot Lock

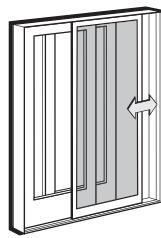

This gliding door panel auxiliary foot lock provides an extra measure of security when the door is in a locked position. Available in finishes that coordinate with hardware.

**NEW**

### EXTERIOR TRIM

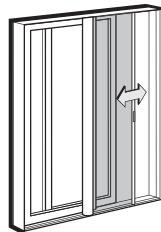

This product now available with Andersen Exterior Trim. See pages 141–144 for details.

### INSECT SCREENS

#### Gliding Insect Screen

Gliding insect screens are available for two- and four-panel doors with frames in White, Sandtone or Terratone® color baked-on enamel finish. Square corner joint construction adds considerable strength to the frame members, and the long-lasting\* fiberglass screen cloth has a charcoal finish. Delrin® injection molded bottom rollers with self-contained leveling adjusters provide smooth operation. Interior and exterior pulls and latch are provided.

#### Retractable Insect Screen

The retractable insect screen is installed on the exterior of the door and opens side-to-side across the width of the opening. When the insect screen is not in use, it neatly retracts into a small canister mounted on the exterior of the door. The retractable insect screen has a long-lasting\* fiberglass screen cloth with a charcoal finish. Canisters are available for two-panel patio doors in White, Sandtone and Terratone® colors. Please note, retractable screen track reduces clear opening height by 1".

### SIDELIGHTS

Stationary units can also be selected for use as sidelights. See size table on page 248 for size options.

**CAUTION:**

- Painting and staining may cause damage to rigid vinyl.
- Products in Sandtone or Terratone® color may be painted any color lighter than Terratone using quality oil-base or latex paint. Submit color samples to Andersen for approval when painting White. Submit color samples to Andersen for approval when painting Sandtone or Terratone any color darker than Terratone.
- Creosote-based stains should not come in contact with Andersen products.
- Do not paint weatherstripping.
- Abrasive cleaners or solutions containing corrosive solvents should not be used on Andersen products.
- For vinyl painting instructions and preparation, contact your Andersen supplier.
- Andersen does not warrant the adhesion of paint to vinyl.

## Clear Opening Details

Scale  $1\frac{1}{2}'' = 1'-0''$  (1:8)

## Ramped Sill Detail

Scale  $1\frac{1}{2}'' = 1'-0''$  (1:8)

## Vertical Non-Reinforced Joining Detail

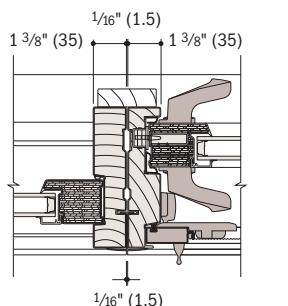

Scale  $1\frac{1}{2}'' = 1'-0''$  (1:8)

### Overall Door Dimension Width

Sum of individual door widths plus  $1/16''$  for each join.

### Overall Rough Opening Width

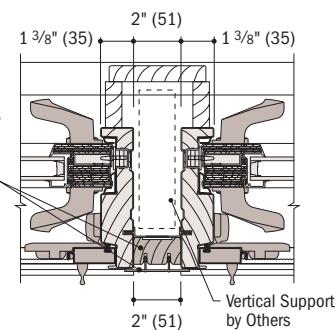

Overall door width plus  $3/4''$ .

## Separate Rough Openings Detail

Scale  $1\frac{1}{2}'' = 1'-0''$  (1:8)

To meet structural requirements or to achieve a wider joined appearance, doors may be installed into separate rough openings having vertical support (by others) in combination with Andersen® exterior filler and exterior vinyl trim.

## Vertical LVL Reinforced Joining Detail

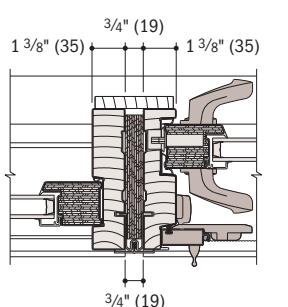

Scale  $1\frac{1}{2}'' = 1'-0''$  (1:8)

### Overall Door Dimension Width

Sum of individual door widths plus  $3/4''$  for each join.

### Overall Rough Opening Width

Overall door width plus  $3/4''$ .

• Light-colored areas are parts included with door. Dark-colored areas are additional Andersen® parts required to complete door assembly as shown.

- Rough openings may need to be increased to allow for use of building wraps, flashing, sill panning, brackets, fasteners or other items. See installation information on page 33.
- Details are for illustration only and are not intended to represent product installation methods or materials. Refer to product installation guides at [andersenwindows.com](http://andersenwindows.com).
- Andersen recommends installation of doors into separate rough openings. Consult with an architect or structural engineer regarding minimum requirements for structural support members between adjacent rough openings.

**Andersen does not recommend joining of receiver jamb to receiver jamb. For more joining information see the combination design section starting on page 259.**
