# Crestline / Vetter Replacement Double Hung Window Sash

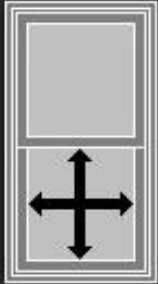

Window sash in this section is a direct replacement for the Crestline Model 303, manufactured from March 1993 to May 2003. The model 303 is a wood window with an aluminum clad exterior (also available in primed wood), with a natural pine interior.

Replacement window sash is built to order. Please note that all orders will be reviewed, confirmed, and signed off on before beginning production. All orders are prepaid.

Below is an extensive list of standard sizes. To order window sash - measure **visible glass dimensions** and identify the correct **catalog size code**. Catalog size codes are the same for top and bottom sash - you must specify top or bottom sash when ordering.

## Step 1: Measuring Visible Glass

### How to Measure Visible Glass

Get started with your selection by measuring the visible glass (VG). Visible glass dimensions can be determined by measuring the width and height of the exposed glass from inside the home. For double hung windows, measure the bottom sash only.

**IMPORTANT: All dimensions are specified as WIDTH X HEIGHT.**

Measurements within + 1/4" should be rounded to the nearest standard size as listed in the table below. Visible glass dimensions that are greater or less than 5/16" of a standard size means it is a custom sized window.

## Step 2. Identifying Catalog Size Code

Once you have determined the visible glass size, refer to the listing below to find the correct catalog size code.

| Catalog Size Code | Visible Glass Size (WIDTH X HEIGHT) |
|-------------------|-------------------------------------|
| 18210             | 14 15/16" X 12 15/16"               |
